IDENTIFIERS	*Florida

ABSTRACT

An inventory is provided of the programs offered in Florida's 28 community colleges during 1980-81. First, the programs are listed, by Information Classification Structure (ICS) code, for each college and campus. Included in this listing is information on the program's title; whether, in the case of occupational programs, it prepares graduates for employment at the technical level or at a skilled or semi-skilled level; program length computed in terms of student semester hours or clock hours required to complete the program; and the type of award given upon program completion, i.e., Associate in Arts/Science, Associate in Applied Science, Technical Certificate, Certificate of Applied Sciences, or Certification of Training. The next section lists programs for the entire community college system by ICS codes, which categorize programs as advanced and professional or occupational, and within the occupational category, as agriculture, distributive, health, home economics, office, trade and industrial, or public service programs. This section indicates the colleges and campuses at which the program is offered, program title, occupational program type, program length, and degree or certificate awarded. (HB)

Points of view or opinions stated in this document do not necessarily represent official NIE position or policy.

The Report of Annual Program Inventory for 1980-81 presents a list by college and systemwide of all programs offered by the 28 community colleges in Florida. These programs cover a wide variety of subjects and range from two-year Associate in Arts degree programs to less than one-semester certificate programs. Definitions for the different types of programs and kinds of degrees are found on the next page. The individual colleges are listed first in alphabetical order followed by the systemwide listing. All programs in the latter document are given the Information Classification Structure (ICS) order. ICS codes include the following general categories:

1.11 - 1.19	Advanced and Professional
1.21 - 1.27	Occupational Programs
1.21	Agriculture
1.22	Distributive
1.23	Health
1.24	Home Economics
1.25	Office
1.26	Trade and Industrial
1.27	Public Service

LEGEND

The following definitions are used in the Annual Program Inventory of the Division of Community Colleges.

TYPE - Occupational Program Type. There are two levels of Occupational Programs offered in community colleges, namely:

A. Postsecondary Technical (Tech) - This includes programs of study and their related courses designed to prepare persons for employment at the technical level which is between that of the skilled and the professional. These are usually two-year programs of study made up of college-level credit courses which are, for the most part, transferable.

B. Postsecondary Skilled/Semi-Skilled (Voc) - This includes programs of study and their related courses designed to prepare students for employment at a semi-skilled or skilled level which is between that of the unskilled and the technician. These are usually clock-hour or institutional-credit programs and courses.

LGTH - The number of semester credit hours (SSH) or clock hours (CLK) required to complete the program.

DEG - The type of award given upon completion of a program as defined below:

A.A. - Associate in Arts. An award certifying the completion of a two-year lower division undergraduate program of studies which is applicable to a bachelor's or advanced degree.

A.S. - Associate in Science. An award certifying the completion of a two-year technical program of study. In some cases students completing these programs transfer to a university to complete a higher-level degree in the field. Therefore, the A.S. degree is not necessarily a terminal degree.

AAS - Associate in Applied Science. An award certifying the completion of a two-year vocational program of study.

T.CT - Technical Certificate. An award certifying the completion of technical programs of study consisting principally of the prescribed specialized courses in the program area. These are programs which usually consist of one academic year of full-time study.

CTAS - Certificate of Applied Sciences. An award certifying the completion of a vocational program of study which is usually of a duration longer than one term (semester), but less than two years of full-time study.

CTTR - Certification of Training. An award certifying the completion of a vocational program of study which is one term (semester) or less of full-time study.
